

AUSPICE DIVERSIFIED TRUST

The Management Report of Fund Performance contains Financial Highlights but does not contain the complete financial statements of the Investment Fund.

For the year ended December 31, 2023

Auspice Capital Advisors Ltd.
Investment Manager
Calgary, AB, Canada

Forward-Looking Statements (“FLS”)

The annual Management Report of Fund Performance may contain forward-looking statements. FLS means disclosure regarding possible events, conditions or results of operations that is based on assumptions about future economic conditions and courses of action, and includes any future-oriented financial information (“FOFI”) with respect to prospective results of operations, financial position or cash flows that is presented either as a forecast or a projection. FOFI is FLS about prospective results of operations, financial position or cash flows, based on assumptions about future economic conditions and courses of action.

FLS can be identified by the use of forward-looking terminology such as “may”, “will”, “should”, “expect”, “anticipate”, “target”, “project”, “estimate”, “intend”, “continue” or “believe”, or the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of one of the Fund may differ materially from those reflected or contemplated in such forward-looking information and statements. Material risk factors that could affect actual results are identified under the heading “What are the Risks of Investing in the Fund?” in the Fund’s Simplified Prospectus. Investors are also cautioned that FLS is based on a number of factors and assumptions, including a Fund’s current plans, estimates, opinions and analysis made in light of its experience, current conditions and expectations of future developments, as well as other relevant factors. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.

Disclosure:

This annual management report of fund performance contains financial highlights, but does not contain the complete annual financial statements of the Fund. You can get a copy of the annual financial statements of the Fund at your request, and at no cost, by calling 1-888-792-9291, by emailing us at info@auspicecapital.com, by visiting our website at www.auspicecapital.com, by visiting SEDAR+’s website at www.sedarplus.ca, or by contacting your advisor. You may also contact us using one of these methods to request a copy of the Fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

AUSPICE DIVERSIFIED TRUST

MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2023

This Management Report of Fund Performance represents the portfolio management team's view of the significant factors and developments affecting the investment fund's performance and outlook for the year ended December 31, 2023. Every effort has been made to ensure the information contained in this Management Report of Fund Performance is accurate and complete, however, the investment fund cannot guarantee the accuracy or the completeness of this material. For more information, please refer to the Auspice Diversified Trust's Simplified Prospectus ("Prospectus"). In this report, "Manager", refers to Auspice Capital Advisors Ltd., the Manager of the Fund. The "Fund" refers to Auspice Diversified Trust. In addition, "net asset value" or "NAV" refers to the value of the Fund as calculated for transaction purposes, on which the discussion of Fund performance is based. All dollar figures are reported in Canadian dollars.

Investment Objective and Strategies

The Fund seeks to generate returns on investment in, trading in or exposure to commodity and financial interests. Using a disciplined rules-based investment process, the Fund aims to capture dominant trends long and short, agnostic to market direction and popular consensus. Risk management and capital allocation is systematic to preserve capital as the strategy's core objective along with providing returns that are non-correlated to traditional equity, fixed income and most alternative strategies. An important objective of the Fund is to provide performance and crisis alpha in times of significant equity correction.

The Manager uses a rules-based investment process to allocate capital and provide disciplined risk management. Sector allocation parameters ensure risk diversification and all positions have stringent risk management parameters. The strategy employed by the Manager is indiscriminately long or short, able to capture trends in both up and down markets. This historically results in returns that have a low correlation to traditional equity, fixed income, and real estate investments.

The Manager uses multiple strategies over multiple timeframes to participate in and capture trends. These strategies derive returns by adapting systematically to changes in volatility resulting in a greater efficiency in capturing the trends in each individual market. The result is a more efficient use of capital and a low margin to equity ratio. Robustness, capital preservation and risk management are the highest priorities. On average, over the Fund's track record, less than 7% of investor capital is used to create exposures with the balance earning a cash return.

The Fund may use leverage through the use of cash borrowings, short sales and derivatives. The Fund will manage its risk in such a manner as to keep the absolute Value at Risk or "VaR" under 20% of its net asset value. VaR is defined as the potential losses on an instrument or portfolio, expressed as a percentage of the value of the portfolio's assets over a specified time horizon and at a given confidence level. Absolute VaR is an approach of VaR generally used when there is no reference portfolio or benchmark.

The success of the Fund depends on the continued services of the Manager and will be influenced by a number of risk factors associated with investments in equities, options, and other instruments and the use of leverage, including derivative hedge risk, market liquidity, short sales, portfolio turnover, foreign currency exposure, and interest rate fluctuations.

Risk

Auspice Capital Advisors Ltd. ("Auspice") has rated the volatility of this Fund as **medium**. This rating is based on how much the Fund's returns have changed from year to year. It does not tell you how volatile the Fund will be in the future. The rating can change over time. For more information about the risk rating and specific risks that can affect the Fund's returns, refer to the risk section of the Fund's simplified prospectus.

For the year ended December 31, 2023, there were no changes affecting the overall level of risk associated with an investment in the Fund. Therefore, the overall level of Fund risk and investor risk tolerance remains as stated in the Prospectus.

AUSPICE DIVERSIFIED TRUST

MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2023

Leverage Relief

The Fund has obtained exemptive relief to permit the Manager to use the Absolute VaR based risk management approach that allows the 20-day value-at-risk of the Fund to be up to 20% of the NAV of the Fund's portfolio, and not to be in excess of this limit for more than five consecutive business days. This method is used instead of having to comply with the leverage constraint that applies to alternative mutual funds in NI 81-102 (i.e., an alternative mutual fund's aggregate exposure to cash borrowing, short selling and the notional value of specified derivative transactions must not exceed 300% of the fund's net asset value). The Fund uses a managed futures strategy that is historically uncorrelated with equity benchmarks. Consequently, the relief allows the Fund to use the Absolute VaR based risk management approach as it is a better measure of risk for the Fund than the notional exposure approach that is prescribed by NI 81-102. In addition to limiting VaR, relief is conditional on compliance with several risk management obligations, including the appointment of a derivatives risk manager, the creation of a derivatives risk management program, external verification of the Fund's VaR calculations and additional reporting requirements. During the period from March 1, 2023 to December 31, 2023, the Fund maximum 20 day VaR was 14%.

Performance Relief

Prior to February 28, 2023, this Fund was offered via offering memorandum only and this Fund was not a reporting issuer during such prior period. The expenses of the Fund would have been higher during such prior period had the Fund been subject to the additional regulatory requirements applicable to a reporting issuer. Auspice obtained exemptive relief on behalf of the Fund to permit the disclosure of the prior performance data for the Fund for the time period prior to it becoming a reporting issuer.

Results of Operations

For the year ended December 31, 2023, Series X units returned -4.79%, Series A returned -5.78%, Series I returned -3.76%, and Series F returned -4.78%. The Manager has identified three benchmarks for the Auspice Diversified Trust Fund:

1. The Barclays BTOP50 Index ("BTOP50") seeks to replicate the overall composition of the managed futures industry with regard to trading style and overall market exposure. The largest investable trading advisor programs, as measured by assets under management, are selected for inclusion in the BTOP50. As of December 31, 2023, there are 21 CTA funds in the Barclay BTOP50 Index. The BTOP50 Index is the most comparable index for Auspice Diversified Trust, however there are significant differences, such as the average exposure to commodity futures (versus financial futures), and average trade length. Reference to the BTOP50 benchmark does not imply that Auspice Diversified Trust will achieve similar performance.
2. The Bloomberg Commodity Index Excess Return (BCOM ER) Index is a broadly diversified commodity price index that tracks prices of futures contracts on physical commodities on the commodity markets. Like Auspice Diversified Trust, the index is designed to minimize concentration in any one sector. No one commodity can represent more than 15% of the BCOM ER index, no one commodity and its derived commodities can represent more than 25% of the index, and no sector can represent more than 33% of the index. There are significant differences between the strategies employed by Auspice Diversified Trust and BCOM ER, however, including that the BCOM ER index is passive and only incorporates commodities futures, whereas Auspice Diversified Trust is an active strategy and which also trades financial futures. Reference to the BCOM ER benchmark does not imply that Auspice Diversified Trust will achieve similar performance.
3. The S&P/TSX 60 ("TSX 60") Index is a stock market index of 60 large companies listed on the Toronto Stock Exchange. Maintained by the Canadian S&P Index Committee, a unit of Standard & Poor's, it exposes the investor to 60 stocks in nine industry sectors. There is a low degree of similarity between the TSX 60 and Auspice Diversified Trust. As the main benchmark for equity performance in Canada, its inclusion is typically used to illustrate how Auspice Diversified Trust is notably different from equities, an important consideration for portfolio managers and investors alike.

AUSPICE DIVERSIFIED TRUST

MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2023

For the year ended December 31, 2023, the BTOP50 Index returned -1.9%, the BCOM ER Index returned -12.6%, and the TSX 60 Index returned 8.2%. Note that the indexes do not include any fees or expenses. After three years of strong outperformance versus benchmarks, from January 1, 2020, to December 31, 2022. The Fund underperformed benchmarks during 2023. Over the four-year period, January 1, 2020, through December 31, 2023, the Fund have outperformed the three stated benchmarks. See table below.

Index	2020	2021	2022	2023	Ann. Return	Ann. Volatility	Max Drawdown
Auspice Diversified Trust Series X	18.5%	9.6%	11.2%	-4.8%	8.3%	11.4%	-15.6%
BTOP50 CTA	4.9%	10.0%	14.9%	-1.9%	6.9%	7.8%	-9.9%
BCOM ER	-3.5%	27.1%	13.8%	-12.6%	5.1%	17.4%	-29.5%
TSX 60	2.0%	24.4%	-9.2%	8.2%	5.7%	16.4%	-35.7%

The net asset value of the Fund increased by 67.8%, from \$115,278,117 as of January 1, 2023, to \$193,408,193 as of December 31, 2023. This change was composed primarily of net purchases of \$88,094,425.

The Fund's performance was driven by losses in six of seven sectors including metals, equities, FX, grains, softs, and energies. Interest rates provided a slight offset and were positive. The Fund benefited from its cash efficiency and large cash position, currently yielding close to 5%.

Recent Developments

Following 3 years of strong returns for CTAs, 2023 was a challenging environment for both passive commodity and active CTA/Managed Futures strategies broadly. While far from the -19.5% S&P 500 equity and -13.1% Bloomberg Aggregate Bond Index corrections in 2022, the CTA BTOP 50 CTA benchmark finished slightly lower in 2023.

At Auspice we believe that commencing 2021 we entered a new regime of structurally higher inflation, volatility, and interest rates. For more on our view on inflation, see the December 31, 2023 Auspice featured special article in the Financial Post "How the '3 Ds' are Leading to a Structural Shift in Inflation" ([here](#)). Deglobalization, decarbonization, and demographics are likely to put a floor on inflation that we believe will be closer to the long-term 4% average since 1970.

Auspice remains bullish broadly on commodities long term. "Agflation" is emerging as yet another commodity supercycle driver on the back of supply shortages consistent with the more capital expenditure (capex) intensive energy and metals sectors. When compared to the previous commodity bull market, which was largely attributable to China, today there are numerous drivers, including our belief that India is set to surpass China as the largest commodity consumer in coming years as the population has now the largest in the world and it has the fastest growing middle class – historically a core driver of commodity consumption and volatility. See [here](#) for our latest commentary on India and how it is also becoming a driver of "agflation".

The number of wars and global conflicts are at the highest levels since WWII. For people under 80 - a large majority of the world's population - we have never lived in a world with so many different conflicts between countries and amongst non state groups such as terrorists' cells and drugs cartels. People might think the world is always violent, wars and conflicts are always happening somewhere – that this moment can't be any special. That would be wrong. Going forward, the risks, in our opinion, are highly skewed to the upside. Read more [here](#).

AUSPICE DIVERSIFIED TRUST

MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2023

Related Party Transactions

Management fees:

The Manager receives a management fee payable by the Fund for providing its services to the Fund. The management fee plus applicable taxes are calculated daily and paid monthly in arrears and will equal the appropriate percentage of the Series NAV of the applicable Series of Units of the Fund on each business day plus any subscriptions and less redemptions for that day.

The annual management fee as a percentage of NAV for each series is shown below:

- Series A units: 2.0% per annum
- Series F units: 1.0% per annum
- Series I units: Negotiated fee paid directly to the Manager
- Series X units: 1.0% per annum

Performance fees:

The Manager shall receive a performance fee in respect of each series of units of the Fund on each performance valuation date, June 30 and December 31, or on a redemption on a pro rata basis, provided that the series NAV before performance fee is greater than the series' non-resetting High Water Mark plus Hurdle Rate, if applicable. The performance fee plus the applicable taxes is calculated each business day and payable in arrears.

The performance fee as a percentage of series is shown below:

- Series A and F units: 20% of new profits above the High Water Mark
- Series I units: Negotiated fee paid directly to the Manager
- Series X units: 15% of new profits that exceed the Hurdle Rate

High Water Mark is the minimum amount the Fund must earn to receive a performance fee and is non-resetting. The Hurdle Rate is calculated daily by multiplying the daily 90-day Government of Canada Treasury Bill rate and the series High Water Mark.

Disclaimers

The returns for the **Auspice Diversified Trust** are net of fees. Prior to February 28, 2023, the Fund was offered by means of an offering memorandum and the Fund was not a reporting issuer during such prior period. Auspice Diversified Trust's performance is based in Canadian Dollars or CAD. The expenses of the Fund would have been higher during such prior period had the Fund been subject to the additional regulatory requirements applicable to a reporting issuer. Auspice obtained exemptive relief on behalf of the Fund to permit the disclosure of the prior performance data for the Fund for the time period before it became a reporting issuer.

Past results are not necessarily indicative of future results. Futures trading is speculative and is not suitable for all customers. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing. The indicated rates of return are the historical annual compounded total returns including changes in share and/or unit value and reinvestment of all dividends and/or distributions and do not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed, their values change frequently and past performance may not be repeated.

(1) This information is derived from the Fund's annual financial statements for December 31, 2023, prepared under International Financial Reporting Standards and is not a reconciliation of beginning and ending net assets per unit.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/(decrease) from operations is based on the weighted average number of units outstanding over the financial year.

(3) Distributions were paid in cash or automatically reinvested in additional units of the Fund, or both.

(4) This information is provided as at December 31, 2023

(5) Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average NAV during the year.

(6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average NAV during the year. Included in the trading expense ratio are the futures and forward fees.

(7) The Fund's portfolio turnover rate indicates how actively the Fund's advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the units in its portfolio once in the course of the year. The higher a funds' portfolio turnover rate in the year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

MANAGEMENT REPORT OF FUND PERFORMANCE

Financial Highlights – December 31, 2023

Annual Returns

The following table shows the Fund's annual return for each series of the Fund for each of the periods indicated ending December 31.

Past performance of the Fund

There were no distributions made by the Fund in the period shown. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. The performance of the Fund in the past does not necessarily indicate how it will perform in the future.

Annual Compound Returns

The following bar chart represents the performance of units of the Fund. The bar chart shows, in percentage terms, how much an investment made on the first day of each year would have increased or decreased by the last day of each such year.
